

TECHNICAL REVIEW REPORT

Automation Assessment and Evaluation

1. Document Information

Item	Details
Project Name	
Automation Name	
Review Date	
Reviewer(s)	
Department/Area	
Version	
Status	Draft / In Review / Approved

2. Executive Summary

Objective

Provide a brief description of the automation under review and the purpose of this assessment.

Scope

Define what components, systems, workflows, and integrations were included in the review.

Overall Assessment

Category	Rating
Technical Design	☐ Excellent ☐ Good ☐ Fair ☐ Poor
Reliability	☐ Excellent ☐ Good ☐ Fair ☐ Poor
Security	☐ Excellent ☐ Good ☐ Fair ☐ Poor
Maintainability	☐ Excellent ☐ Good ☐ Fair ☐ Poor
Performance	☐ Excellent ☐ Good ☐ Fair ☐ Poor
Documentation	☐ Excellent ☐ Good ☐ Fair ☐ Poor

Final Recommendation

- ☐ Approve
 - ☐ Approve with Recommendations
 - ☐ Requires Remediation
 - ☐ Reject
-

3. Automation Overview

Business Purpose

Describe the business problem solved by the automation.

Process Description

Summarize the automated workflow.

Systems Involved

System	Purpose

Automation Type

- ☐ RPA
 - ☐ Workflow Automation
 - ☐ API Integration
 - ☐ ETL/Data Pipeline
 - ☐ AI/ML Automation
 - ☐ Low-Code Platform
 - ☐ Other
-

4. Architecture Review

Architecture Diagram Reference

Document or link to architecture diagram.

Design Evaluation

Evaluation Area	Assessment
Solution Design	
Scalability	
Modularity	
Error Handling	
Dependency Management	
Integration Design	

Findings

Strengths

-
-
-

Weaknesses

-
-
-

5. Functional Review

Requirements Coverage

Requirement ID	Requirement Description	Status
		Met / Partial / Not Met
		Met / Partial / Not Met

Business Logic Validation

Item	Result
Workflow Accuracy	
Decision Rules	
Exception Handling	
Data Validation	

Observations

-
-
-

6. Technical Quality Assessment

Code Quality

Criteria	Rating	Comments
Readability	1-5	
Maintainability	1-5	
Reusability	1-5	
Standards Compliance	1-5	

Configuration Management

Area	Assessment
Source Control Usage	
Versioning Strategy	
Deployment Process	
Environment Separation	

7. Security Review

Security Controls Assessment

Control Area	Status	Comments
Authentication	Pass / Fail	
Authorization	Pass / Fail	
Credential Management	Pass / Fail	
Data Encryption	Pass / Fail	
Audit Logging	Pass / Fail	
Regulatory Compliance	Pass / Fail	

Security Risks Identified

Risk ID	Description	Severity	Recommendation
		Low/Medium/High	

8. Performance Review

Performance Metrics

Metric	Expected	Actual
Execution Time		
Throughput		
Success Rate		
Resource Consumption		

Stress/Load Test Results

Test Scenario	Result
Normal Load	
Peak Load	
Failure Recovery	

Findings

-

9. Reliability and Supportability

Operational Assessment

Area	Rating	Comments
Monitoring	1-5	
Alerting	1-5	
Logging	1-5	
Recovery Procedures	1-5	
Operational Documentation	1-5	

Failure Scenarios Reviewed

Scenario	Outcome
System Unavailable	
API Failure	
Invalid Data	
Timeout Event	

10. Documentation Review

Documentation Availability

Document	Available	Comments
Solution Design	Yes/No	
Process Flow	Yes/No	
User Guide	Yes/No	
Support Guide	Yes/No	
Deployment Guide	Yes/No	

11. Risks and Issues

Identified Risks

ID	Risk Description	Impact	Probability	Mitigation
----	------------------	--------	-------------	------------

Open Issues

ID	Issue Description	Owner	Due Date
----	-------------------	-------	----------

12. Recommendations

Immediate Actions

1. 2. 3.

Medium-Term Improvements

1. 2. 3.

Long-Term Enhancements

1. 2. 3.

13. Review Conclusion

Summary

Provide an overall assessment of the automation's readiness, technical quality, risks, and operational sustainability.

Approval Decision

- ☐ Approved
- ☐ Approved with Conditions
- ☐ Requires Rework
- ☐ Rejected
